

OEL-1287-64

MEMORANDUM FOR: DAD/S&D/OEL
DAD/IO/OEL

SUBJECT: Telemetry Analog Position Development

1. In order to be certain that responsibility for development of the analog position is clearly understood, the following ground rules are established:

a. OEL is fully responsible for the establishment of the analog positions insuring that proper tests and evaluation are performed and that performance is satisfactory to OSI, FMSAC and their contractors. In the absence of more definitive specifications, analogs produced will be at least of the quality provided by [REDACTED] to its contractors.

b. [REDACTED] has responsibility for supplying men, materials and services to the extent specified by OEL. [REDACTED] is not to be given responsibility for satisfactory operation of the entire system. Details of work to be accomplished by [REDACTED] will be specified in clearly delineated tasks.

c. [REDACTED] is the engineer in [REDACTED] fully responsible for design, fabrication and satisfactory performance of the analog positions. [REDACTED] is assigned responsibility to assist [REDACTED] and to insure prompt and proper assistance from the [REDACTED] facility.

2. It is requested that [REDACTED] prepare a definitive specification for the system and series of individual tasks to be assigned to the [REDACTED]

GEORGE C. MILLER

Assistant Director for ELINT
DD/S&T
